

Full Electricity Disclosure for Energy Supply

(Secondary Electricity Labeling in accordance with the Electricity Labeling Regulation 2022 – KenV 2022)

Energy Sources

Primary Energy Source	Supplier Mix
Hydropower	52.82%
Solar Energy	26.65%
Wind Energy	14.34%
Other Renewable Energy Sources	6.19%
Total	100.00%

You will find information here about the sources from which the electrical energy originates, as well as information on environmental impacts.

Electricity labeling pursuant to § 78 (1) and (2) of the Austrian Electricity Industry and Organization Act 2010 (ElWOG 2010) and the Electricity Labeling Regulation 2022 (KenV 2022), showing the share of different primary energy sources on the basis of which the supplied electrical energy was generated during the period from **01 January 2025 to 31 December 2025**.

The guarantees of origin used originate **100% from Austria**.

The generation of the present supplier mix produces **neither CO₂ emissions nor radioactive waste**
